

Guide to Voting Green at Town Meeting

The PCT supports the following Open Space Committee sponsored articles on the Town Warrant and encourages voters to vote Yes on them at Town Meeting on April 1st.

ARTICLE 25 YES

The PCT supports Article 25 which transfers care and custody of 63-R Howland Street, which was voted unanimously by town voters in 2022 to designate as park, passive recreation, and conservation, from the Select Board to the Conservation Commission, aligning it with all other town-owned conservation properties.

ARTICLE 26 YES

The PCT supports Article 26 which establishes 2 Sandy Hill Lane as park, passive recreation and conservation land and transfers the .3 acres under the care and custody of the conservation commission. The small town-owned parcel is 90% undevelopable and abuts already protected wetlands which serve as habitat for species of special concern.

ARTICLE 27 YES

The PCT supports Article 27 which establishes 30 Creek Road as park, passive recreation and conservation land and transfers the .49 acres under the care and custody of the Conservation Commission. This town-owned parcel was deemed undevelopable after the discovery that it is still used as habitat for the threatened eastern spadefoot toad. This woodland and wetland parcel abuts already conserved parcels.

ARTICLE 28 YES

The PCT supports Article 28 which transfers custody of the Old Colony Nature Pathway to the Conservation Commission for passive recreation and conservation purposes. In 1995, Town Meeting voted to dedicate this parcel for park, recreation, and conservation purposes, including naming it the Old Colony Nature Pathway, indicating a preference for conservation purposes. This transfer would bring the pathway into alignment of other town-owned conservation parcels.

This flyer was prepared by the non-profit Provincetown Conservation Trust at no cost to taxpayers. PCT is not affiliated with the town government. We are a private, non-profit (501c3) organization, founded in 1980, dedicated to preserving the woods, wetlands, heathlands, dunes and forest of Provincetown, home to a great variety of native flora and fauna.
